

# How to enlarge System Text

## 1. Using a bigger System Scaling value

This will enlarge both text and UI.

> Go to **“Settings → System → Display”**

Click on the slider which is under the text **“Size of text, apps, and items on this display”**

Drag it to **right** to **increase** the value which will result in **bigger text & adaptive big UI** for the size

> Click **“Apply”** to set the chosen value, and then click **“Restart now”** to apply it

This change requires restarting your device.

Restart now

Cancel

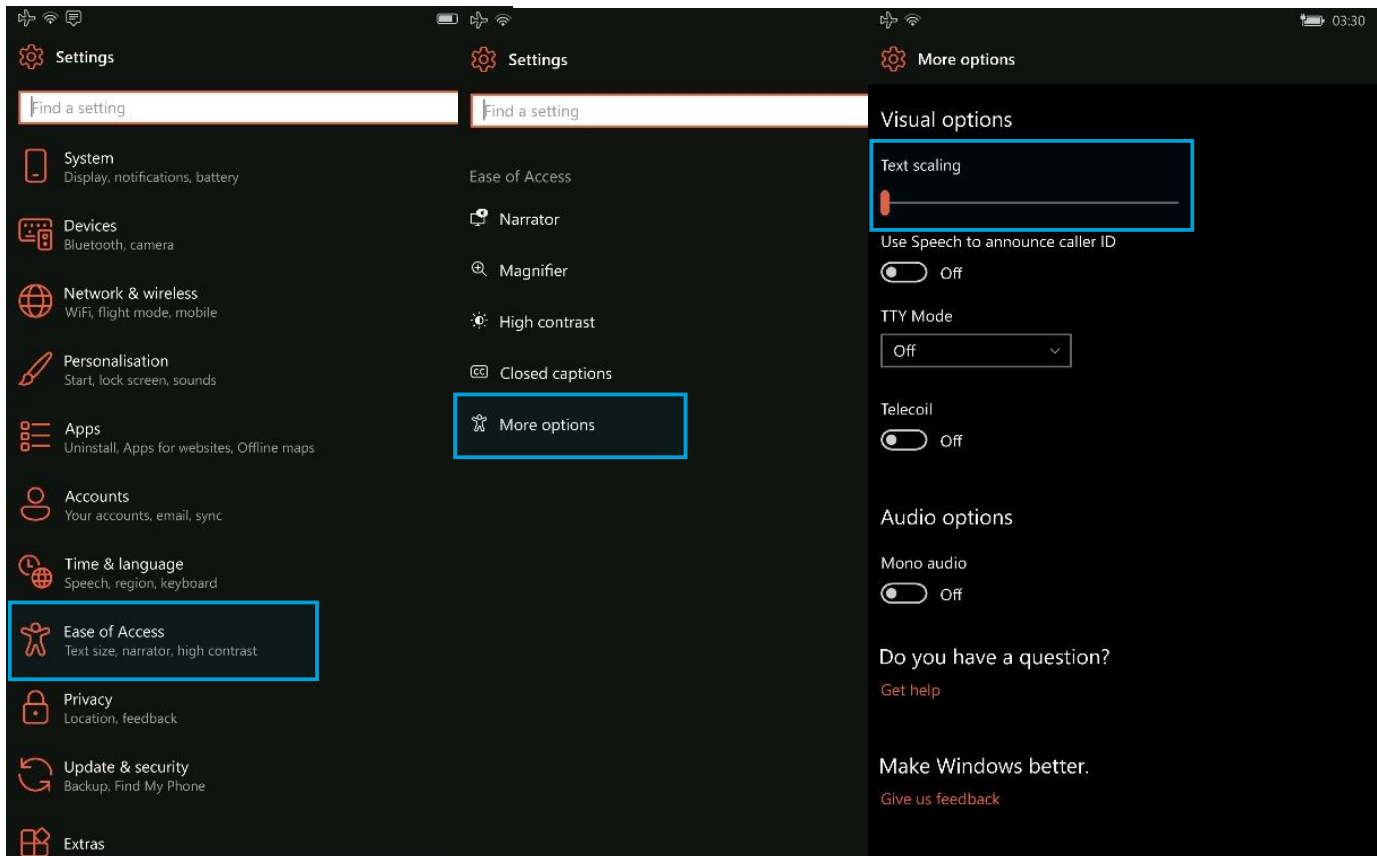

## 2. Using a bigger Text Scaling Value

This will enlarge only the text size.

> Go to “Settings → Ease of Access → More options”

Click on the slider which is under the text “Text Scaling”

Drag it to **right** to increase Text size.

(No restart is needed, changes are immediate)
